CLINICAL REPORT - How to Interpret Lab Order Results uscisClinic.com

Test	Result	Abnormal	Reference	Units
N. GONORRHOEAE RRNA Urine Test	NEGATIVE	<<< Negative means OK	Negative	
QUANTIFERON-TB GOLD PLUS Blood Test	NEGATIVE	<<< Negative means OK	NEGATIVE	
Note: If Positive (Red color) you need Chest X-ray (2 views) to rule out active TB. If positive, Contact Us for X-Ray order				
RPR *NJ1 Blood Test	NON REACTIVE			Note: Non Reactive RPR means Syphilis is absent, OK

MUMPS VIRUS Ab. (IgG) Blood Test	>300.0	IMMUNE if >10.9	Your Immunity is > 300. You are Immune. No shot needed if >10.9	
RUBEOLA/MEASLES(IgG) Blood Test	18.2	IMMUNE if >16.4	Your Immunity is > 18.2. You do NOT need MEASLES shot if > 16.4	
RUBELLA, IgG NJ1 Blood Test	185.7	IMMUNE if >9.9	Your Immunity is >185.7. You do NOT need RUBELLA shot if > 9.9	

HEP. B SURF. AB. *
 Blood Test

Reactive *>> **Reactive** means you have immunity & you do NOT need HEP B vaccine.

If it was non-Reactive (black color), means you do NOT have immunity and you will need two or three vaccine shots. Red Color (**Reactive**) in this test is good news.
